The *Mathematical Intelligencer* Index

Volume 16

Authors

Akin, Ethan. "Chaos Unimportant" Claims Topologist. (4) 45–47.

Andrews, George E. The Death of Proof? Semi-Rigorous Mathematics? You've Got to be Kidding? (4) 16–18.

Andrews, George E. Review of *Ramanujan's Notebooks*, Pt. 3, by Bruce C. Berndt. (3) 69–71.

Angell, Thomas S. Review of *Linear Integral Equations*, by Rainer Kress. (1) 63–67.

Angell, Thomas S. Review of *A Course on Integral Equations*, by Allen C. Pipkin. (1) 63–67.

Angell, Thomas S. Review of *Integral Equations: A Practical Treatment from Spectral Theory to Applications*, by David Porter and David G. Stirling. (1) 63–67.

Angell, Thomas S. Review of *Integral Equations and Applications*, by Constantin Corduneanu. (1) 63–67.

Baas, Nils A. Sophus Lie. (1) 16–19.

Baez, John C. Review of *The Physical Basis of the Direction of Time*, by H.D. Zeh. (1) 72–75.

Barrow-Green, June. International Congresses of Mathematicians from Zurich 1897 to Cambridge 1912. (2) 38–41.

Bressoud, David M. Review of *L'Aurore des Dieux*, by Jacques Dixmier. (3) 72–74.

Bressoud, David M. Review of *The Search for E.T. Bell also known as John Taine*, by Constance Reid. (3) 72–74.

Brown, Ronald. Sculptures by John Robinson at the University of Wales, Bangor. (3) 62–64.

Campbell-Kelly, Martin. Rejoinder to Michael Davis. (4) 27–28.

Coxeter, H.S.M. Symmetrical Combinations of Three or Four Hollow Triangles. (3) 25–30.

Davis, Chandler. As Others See Us: Responses. (2) 5.

Davis, Michael. Righting the Early History of Computing, or How Sausage Was Made. (4) 21–26.

Davis, Michael. Rejoinder to Martin Campbell-Kelly. (4) 28.

Dorwart, Harold L. Review of *Leonardo*, Special Issue, Visual Mathematics, Guest Editor: Michele Emmer. (1) 70–72.

Gale, David. Mathematical Entertainments. (2) 25–31; (4) 38–44.

Gale, David, and Propp, Jim. Mathematical Entertainments. (1) 37–44.

Gale, David, and Woodin, W. Hugh. Mathematical Entertainments. (3) 31–35.

Gold, Bonnie. What is the Philosophy of Mathematics, and What Should It Be? (3) 21–24.

Grabiner, Judith Victor. Review of *A History of Mathematics: An Introduction*, by Victor J. Katz. (4) 73–76.

Gray, Jeremy. Eduard Cech. (4) 48–49.

Gray, Jeremy. Green and Green's Functions. (1) 45–47.

Gray, Jeremy. Otto Hölder and Group Theory. (3) 59–61.

Hales, Thomas C. The Status of the Kepler Conjecture. (3) 47–58.

Hargittai, István, and Hargittai, Magdolna. Symmetry of Opposites. (2) 60–66.

Hargittai, Magdolna. See Hargittai, István, and Hargittai, Magdolna.

Hawkins, Thomas. The Birth of Lie's Theory of Groups. (2) 6–17.

Hinz, Andreas M. Laplace in Calvados. (2) 56–59.

Huylebrouck, D. Captain Mangin-Bocquet's Contribution to Mathematics. (1) 8–9.

Ibragimov, Nail H. Sophus Lie and Harmony in Mathematical Physics, on the 150th Anniversary of His Birth. (1) 20–28.

Keen, Linda. Hyperbolic Geometry and the Spaces of Riemann Surfaces. (3) 11–19.

Krantz, Steven G. Glossary of Common Math Terms. (1) 36.

Lambek, J. Are the Traditional Philosophies of Mathematics Really Incompatible? (1) 56–62.

Landau, Susan. How to Tangle with a Nested Radical. (2) 49–55.

Laubenbacher, Reinhard C., and Pengelley, David J. Gauss, Eisenstein, and the "Third" Proof of the Quadratic Reciprocity Theo-rem: Ein Kleines Schauspiel. (2) 67–72.

Mac Lane, Saunders. Jobs in the 1930s and the Views of George D. Birkhoff. (3) 9–10.

Mac Lane, Saunders. Will Fermat Last? (3) 65.

McLachlan, Robert. A Gallery of Constant–Negative–Curvature Surfaces. (4) 31–37.

McLeay, Heather. A Closer Look at the Cast Ironwork of Australia. (4) 61–65.

Milligan, Lloyd and Yarnall, Kenneth. Review of *The World's Most Famous Math Problem*, by Marilyn vos Savant. (3) 66–69.

Mills, T.M. Review of *Exact Constants in Approximation Theory*, by N. Korneichuk. (1) 68–70.

Mitchell, Evelyn. Review of *Bayes or Bust*, by John Earman. (4) 66–68.

Mooney, John. Colin Maclaurin and Glendaruel. (1) 48–49.

Monna, A.F. Oswald Veblen. (1) 50–51.

Park, Robert L. The Copernican Principle. (1) 4.

Park, Robert L. The Copernican Principle and the Rise of Alternative Science. (4) 44.

Patton, Peter C. Review of *John von Neumann and the Origins of Modern Computing*, by William Aspray. (4) 72–73.

Pengelley, David J. See Laubenbacher, Reinhard C., and Pengelley, David C.

Phillips, Ralph. Reminiscences about the 1930s. (3) 6–8.

Propp, Jim. See Gale, David, and Propp, Jim.

Riskin, Adrian. Copyrights and Wrongs. (1) 6–7.

Riskin, Adrian. Euclid. (4) 20.

Sabatier, Pierre. Review of *Inverse Acoustic and Electromagnetic Scattering Theory*, by D. Colton and R. Kress. (2) 73–75.

Schroeder, Manfred. How Probable is Fermat's Last Theorem? (4) 19–20.

Schroeder, Manfred. Review of *Searching for Certainty: What Scientists Can Know About the Future*, by John L. Casti. (3) 72.

Schweigman, C. and Zhang, S. The Teachings of Hua Loo-Keng: A Challenge Today? (3) 36–46.

Shen, A. Entrance Examinations to the Mekh-mat. (4) 6–10.

Shepp, Lawrence. A Moral Dilemma. (4) 3.
Sher, R.B. Max Dehn and Black Mountain College. (1) 54–55.
Shub, Michael. Mysteries of Mathematics and Computation. (1) 10–15.
Slade, Gordon. Self–Avoiding Walks. (1) 29–35.
Spalt, Detlef. Quo Vadis—History of Mathematics? (3) 3–5.
Stirling, David G., and Porter, David. see Porter, David and Stirling, David G. (1) 63–67.
Thiele, Rüdiger. Mathematics in Göttingen. (4) 50–60.
Todd, John. G.H. Hardy as an Editor. (2) 32–37.
Traub, J.F. and Werschulz, A.G. Linear Ill–Posed Problems Are Solvable on the Average for all Gaussian Measures. (2) 42–48.
van Dijk, Gerrit. Thomas Joannes Stieltjes: Honorary Doctor of Leiden University. (1) 52–53.
Vershik, A. Admission to the Mathematics Faculty in Russia in the 1970s and 1980s. (4) 4–5.
Werschulz, A.G. See Traub, J.F. and Werschulz, A.G.
Williams, Kim. The Sacred Cut Revisited: The Pavement of the Baptistery of San Giovanni, Florence. (2) 18–24.
Wilson, Robin. Stamp Corner. (1) 76; (2) 76; (3) 76; (4) 78.
Wimp, Jet. Review of *Selected Problems in Real Analysis, v. 107, AMS Series of Translations of Mathematical Monographs,* by B.M. Makarov, M.G. Goluzina, A.A. Lodkin, and A.N. Podkorytov. (4) 68–72.
Woodin, W. Hugh. See Gale, David, and Woodin, W. Hugh.
Yarnall, Kenneth. See Milligan, Lloyd, and Yarnall, Kenneth.
Zerger, Monte J. Student Questions You Love to Hate. (4) 29–30.
Zeilberger, Doron. Theorems for a Price: Tomorrow's Semi–Rigorous Mathematical Culture. (4) 11–15.
Zhang, S. See Schweigman, C. and Zhang, S.

Reviews

Aspray, William. *John von Neumann and the Origins of Modern Computing.* Reviewed by Peter C. Patton. (4) 72–73.
Berndt, Bruce C. *Ramanujan's Notebooks, Pt. 3.* Reviewed by George E. Andrews. (3) 69–71.
Casti, John L. *Searching for Certainty: What Scientists Can Know About the Future.* Reviewed by Manfred Schroeder. (3) 72.
Colton, D., and Kress, R. *Inverse Acoustic and Electromagnetic Scattering Theory.* Reviewed by Pierre Sabatier. (2) 73–75.
Corduneanu, Constanin. *Integral Equations and Applications.* Reviewed by Thomas S. Angell. (1) 63–67.
Dixmier, Jacques. *L'Aurore des Dieux.* Reviewed by David M. Bressoud. (3) 73–74.
Earman, John. *Bayes or Bust.* Reviewed by Evelyn Mitchell. (4) 66–68.
Emmer, Michele, ed. Special Issue of *Leonardo,* Visual Mathematics. Reviewed by Harold L. Dorwart. (1) 70–72.
Goluzina, M.G. See Makarov, B.M., Goluzina, M.G., Lodkin, A.A., and Podkorytov, A.N.
Katz, Victor J. *A History of Mathematics: An Introduction.* Reviewed by Judith Victor Grabiner. (4) 73–76.
Korneichuk, N. *Exact Constants in Approximation Theory.* Reviewed by T.M. Mills. (1) 68–70.
Kress, Rainer. Linear Integral Equations. Reviewed by Thomas S. Angell. (1) 63–67.
Lodkin, A.A. See Makarov, B.M., Goluzina, M.G., Lodkin, A.A., and Podkorytov, A.N.
Makarov, B.M., Goluzina, M.G., Lodkin, A.A., and Podkorytov, A.N. *Selected Problems in Real Analysis, v. 107, AMS Series of Translations of Mathematical Monographs.* Reviewed by Jet Wimp. (4) 68–72.
Pipkin, Allen C. A *Course on Integral Equations.* Reviewed by Thomas S. Angell. (1) 63–67.
Podkorytov, A.N. See Makarov, B.M., Goluzina, M.G., Lodkin, A.A., and Podkorytov, A.N.
Porter, David, and Stirling, David G. *Integral Equations: A Practical Treatment from Spectral Theory to Applications.* Reviewed by Thomas S. Angell. (1) 63–67.
Reid, Constance. *The Search for E.T. Bell also known as John Taine.* Reviewed by David M. Bressoud. (3) 72–74.
vos Savant, Marilyn. *The World's Most Famous Math Problem.* Reviewed by Lloyd Milligan and Kenneth Yarnall. (3) 66–69.
Zeh, H.D. *The Physical Basis of the Direction of Time.* Reviewed by John D. Baez. (1) 72–75.
